SKILLS

Languages	HTML, CSS, JavaScript, TypeScript
Frameworks & Tools	React JS, Bootstrap, Tailwind CSS, Redux Toolkit, MUI, JEST, Git, Github, Webpack
Developer Tools	VS code, Figma, Postman

EXPERIENCE

Infinte Locus, SDE-1(Frontend) | Gurugram (Haryana, India). Sept 2024 - Present
SuperTails

- Lead the revamp of critical application features, implementing modern React.js practices to enhance functionality and user experience.
- Redesigned key components of the platform, ensuring responsiveness and alignment with the latest UI/UX trends.
- Collaborated with the team to optimize workflows and deliver high-impact updates to the Supertails project.
- Transformed front-end architecture by implementing modularization, code reusability, and performance optimization strategies; achieved a 35% reduction in development time and a 50% increase in application responsiveness

Wipro, Project Engineer | Pune (Maharashtra, India). May 2022 - Aug 2024
UDC - Universal Driving Classroom

- Developed a responsive and scalable web application using React.js, implementing Tailwind CSS for dynamic and modern UI designs.
- Executed code splitting for better application performance and achieved a 60% decrease in application loading time.
- Enhanced search functionality by implementing debouncing techniques, improving user experience and reducing redundant API calls.
- Built reusable components and modularized the codebase to ensure maintainability and scalability across the application.

Leave Tracking - M&M

- Development of the admin portal for the Leave Tracking Tool using React.js, Redux Toolkit, TypeScript, and Material-UI (MUI) for a highly interactive and user-friendly interface.
- Transformed front-end architecture by implementing modularization, code reusability, and performance optimization strategies; achieved a 35% reduction in development time and a 50% increase in application responsiveness.
- Implemented state management with Redux Toolkit, ensuring consistent and scalable data flow across the admin portal.

1 Projects

HealthBuddy - Appointment Booking Web App

- Developed a full-stack web application for booking medical appointments and processing payments using React.js and Razorpay API..
- Implemented dynamic routing with React Router, ensuring smooth user navigation for appointment details and payment confirmation.
- Integrated Razorpay API for seamless online payment processing, including payment success and cancellation handling.
- Use lazyLoading that reduced the website load time by 400ms and improves the performance.

flipkart-clone - Flipkart - Clone

- Developed a Flipkart clone app using React.js, Redux for state management, and code Splitting for optimized performance
- Implemented React Suspense for handling asynchronous operations, 50% enhancing user experience by displaying loading indicators during data fetching.
- Applied lazyLoading with suspense that led to 20% reduction in initial page and Utilized debouncing techniques to improve search functionality, enhancing the app's responsiveness.
- Leveraged React Router for client-side routing, enabling smooth navigation between different pages of the app.
- Tech stack: React, Node Js, Express Js, Mongo DB, Typescript, Redux toolkit, MUI, React Router Dom, JEST.

EDUCATION

Samrat Ashok Technological Institute, B.Tech in Electronics and communication Engineering | Vidisha, M.P. GPA: 7.65 / 10

Aug 18 - Aug 22

Little Flower School, Higher Secondary | Betul, M.P

Aug 2022
